EXPERIENCE

Data Science Intern — FICO

May 2026 – August 2026

- Conducted exploratory data analysis (EDA) on a 27.7-million-row network intrusion dataset to identify data quality issues, feature relationships, and potential data leakage.
- Built preprocessing pipelines using Python, Pandas, NumPy, and Scikit-learn to prepare large-scale cybersecurity datasets for machine learning.
- Evaluated feature importance through statistical analysis, correlation analysis, and tree-based models to improve baseline model performance.
- Collaborated with senior data scientists to develop baseline intrusion detection models and validate preprocessing decisions.
- Presented technical findings and recommendations during weekly project reviews with cross-functional stakeholders.

Software Engineering Intern — Northrop Grumman

June 2025 – May 2026

- Developed Java and Python applications supporting defense software initiatives across multiple sprint cycles.
- Increased automated unit test coverage from approximately 20% to over 80%, improving release reliability.
- Resolved SonarQube static analysis findings to strengthen code quality and reduce technical debt.
- Participated in Agile sprint planning, testing, debugging, and peer code reviews within a cross-functional engineering team.

Engineering Intern — NASA Marshall Space Flight Center

August 2024 – September 2025

- Designed mechanical components using SolidWorks and Siemens NX to support engineering development projects.
- Supported prototype fabrication, testing, and validation to verify design performance against requirements.
- Presented engineering recommendations to project stakeholders based on testing and validation results.

Research Assistant — NASA — Tuskegee University

Summer 2024

- Performed data analysis and materials testing in support of NASA-affiliated research initiatives.
- Delivered technical presentations summarizing research findings to faculty and NASA collaborators.
- Collaborated with university researchers and NASA personnel to advance ongoing research objectives.

PROJECT

Machine Learning Network Intrusion Detection

- Performed exploratory data analysis on a 27.7-million-record cybersecurity dataset to surface data quality and leakage risks.
- Developed Python preprocessing pipelines and evaluated feature importance to build baseline intrusion detection models using Scikit-learn.

TECHNICAL SKILLS

Programming Languages: Python, Java, C++, SQL

Data Science & Machine Learning: Pandas, NumPy, Scikit-learn, Machine Learning, Feature Engineering, Exploratory Data Analysis, Statistical Analysis, Data Visualization

Software Development: Git, GitHub, Agile, Unit Testing, Debugging, REST APIs

Cloud & DevOps: AWS

Cybersecurity: Network Security, Intrusion Detection, IP Networking

Engineering Tools: SolidWorks, Siemens NX

EDUCATION

Athens State University

Expected Graduation: 2027

B.S., Management of Cybersecurity Operations

J.F. Drake State Community & Technical College

GPA: 3.3

A.A.S., Computer Information Systems | A.A.S., Engineering Design

CERTIFICATIONS

Lean Six Sigma Black Belt | Lean Six Sigma Green Belt | Lean Six Sigma Yellow Belt | Lean Six Sigma White Belt

CompTIA Security+ | CompTIA A+ | CompTIA Linux+ | AWS Cloud Architecture

HONORS & LEADERSHIP

Honors: Jacobs Frontier Scholar, STRADA Scholar, NASA Retiree Scholar, NSC-HSV Scholar, Dean's List

Leadership: President, Blue Eagle Ambassadors | SPARK-5 Graduate | MOCSLI Delegate
